Table PAYMENT

Raptor Offers Secure Payment at Table

Convenient and Increased Productivity

It is frustrating for guests to live through a long billing process resulting from repeated trips by service staff in bringing the bill, closing the bill, and performing a credit card transaction. Even more so when they are presented with wrong bills or card charge slips. The low productivity disengages operations in restaurants leaving behind dissatisfied customers and a higher cost of operation.

To solve these problems, Raptor Table Payment provides a secure payment solution by bringing payment to the table. This is the most advanced payment system in the market and guarantees to improve customer satisfaction and service speed.

With an almost unlimited usability range, this solution can be implemented anywhere and quickly. Raptor Table Payment allows your staff to print a bill, close a bill, and perform a credit card transaction, all within a single step. With such efficiencies, we can expect improved sales and many more satisfied customers.

BENEFITS AT GLANCE

- ✓ Improve overall service quality and customer interaction
- ✓ Achieve higher wait staff productivity while increasing revenues through process efficiencies
- ✓ Increase table turns and customer satisfaction by shortening the payment process
- ✓ Consumers maintain control of their card. Enjoys a significantly higher level of personal security and reduces fraud potential
